

All Purpose Absorbent is a fast acting particulate suitable for the clean up of a broad range of spills. Each specifically sized granule is capable of absorbing up to 75% of its own weight in liquid and will not leach back the absorbed fluid.

It is effective with oil, fuel and hydrocarbon spills and being an inert mineral based absorbent, safe to use on hazardous chemicals. All Purpose Absorbent will also absorb emitted vapours and toxic odours - a huge plus when cleaning up a chemical spill. Being free of quartz, it is non-abrasive and safe to use around machinery.

The granules are nontoxic, nonhazardous and chemical free ensuring this product is environmentally friendly safe and easy to use. Simply cover the spill with All Purpose absorbent, allow a few minutes to soak in and agitate with a stiff broom. When surface appears dry, remove the used absorbent and dispose of in accordance with local government regulations.

Designed for:

- The cleaning up of liquid spills including, strong acid or alkaline solutions, petroleum, hydrocarbons, oil solvents, grease, sewage protein based fluids and other potential pollutants.
- Road works & infrastructure projects
- Spills on roads & accident sites
- Farming and food production
- Fish processing plants
- Cellars – assists to remove dampness
- Mining sites
- Workshops
- Hospitality
- Industrial and domestic applications

Features:

- Suitable for a wide variety of liquids and chemicals
- Nontoxic, nonhazardous, chemical free and environmentally friendly
- Will not leach back absorbed fluids
- High absorbency capacity
- Non-abrasive – will not harm machinery. Contains no quartz
- Absorbs vapours & toxic odours
- Absorbs immediately on contact
