

## Why BioSmart Biohazard?

BioSmart manufactures a high quality range of Biohazard Spill Kits and accessories for the clean-up of spills including: urine, blood, vomit, faeces and saliva. These first response kits play an important role in many industries and workplaces. They assist in the prevention of infectious diseases from spreading through the correct clean-up of spills and also providing protection for staff cleaning up the spill. BioSmart currently offers 3 varieties of Biohazard Spill Kits with refill kits and accessories. Backing up the Biohazard range, is also a soon to be released 'Indoor Safety Range' demonstrating BioSmart's progressive push to provide innovative solutions to improve safety in this area of the market place.

Components for Biohazard Spill kits are locally sourced and 'in house' manufacturing ensures strict quality control protocols are adhered to and consistently maintained. Clients with specific custom requirements can also be catered for with efficient despatch time frames.

As a distributor, we open up the door to help you win. Your representative is right beside you and happy to support you with:

- Technical support & training.
- Product recommendations to ensure your client is receiving the best product for their application.
- Marketing support.
- Warehouse distribution on both the East and West coast of Australia.
- Product release and information updates
- SpillSmart and other associated brands and products

BioSmart is proud to be part of the EnviroSmart Group of companies. A group of companies that for more than 20 years has forged a reputation in excellence in each of their fields. The group includes EnviroSmart with a strong foothold in the spill industry and Everything Water Australia, a leading manufacturer of Oil & Water separation systems, Containment strategies and water treatment solutions.

We thank you for exploring the BioSmart range and welcome the opportunity to assist you further.

## Why Biohazard Spill Kits?

Welcome to BioSmart! Biohazard spills can happen anytime, anywhere in any industry. The most common body fluid spills include vomit, blood, urine, faeces and saliva.

Spills of this nature need to be handled correctly during clean-up. Potential infections can happen through something as simple as broken skin or mouth, nose and eye contact through contact with your hands. Examples of diseases spread through blood or other body fluids include:

- Hepatitis B
- Hepatitis C
- Human Immunodeficiency Virus (HIV) infection
- Cytomegalovirus (CMV) infection

Biohazard Spill Kits are an essential part of workplaces providing a duty of care for staff expected to clean-up a biohazard spill safely. BioSmart provides an easy to 'plug-in' range in this category with a high level distributor support offered.

Cleaning up Biohazard spills correctly and safely to prevent spread of disease and infection is not a new thing. However, the importance of preventing the spread of disease and infection has never been more prevalent and proactive in industry and society as it is today as a result of Covid-19. The BioSmart range will continue to grow and provide great product and solutions to a growing market. Our team are ready to assist you with how you can grow your catalogue with BioSmart Biohazard products.

## Biohazard Body Fluid Absorbents

**Biohazard Economy Body Fluid Absorbent** is a light weight Perlite based granular powder that is easy to handle and perfect for use on body fluid spills. It has good absorption, natural deodorisation properties and coagulates the spill for easy removal. It also features added odour control and offers great value for money without compromising quality.

**Biohazard Premium Body Fluid Absorbent** powder is produced from naturally forming Zeolite. Known for its ability to absorb liquids efficiently, it also has the ability to assist with absorbing odours whilst thickening the spill for a manageable clean-up. This is a heavier, easy to apply powder and with added odour control is our premium biohazard absorbent.

## BioSmart Biohazard Spill Kit Range

BioSmart Economy Biohazard Spill Kits are a cost effective first response spill kit for fast and safe cleaning and removal of urine, vomit, blood, saliva and faeces. These spills need to be handled properly. To assist you, we provide Clear Directions and Personal Protective Equipment for your safety together with our Perlite based BioSmart Economy Body Fluid Absorbent.

BioSmart Premium BioHazard Spill Kits are your first response for fast and safe cleaning and removal of urine, vomit, blood, saliva and faeces. These spills need to be handled properly.
