

BioSmart

BIOHAZARD

SPILL KIT

Economy Single Use Kit

Instructions for use

1. Open the BioHazard Spill Kit Bag and place contents on to a clean surface.
2. Put on all the protective clothing provided: Face Mask & Eye Protection, Protective Apron & Gloves.
3. Open the 500ml bag of BioSmart Economy 'Perlite' Body Fluid Absorbent Powder. Carefully pour the contents evenly over the spill. Start from the outside and work towards the centre.
4. Ensure spill is generously covered and if required, agitate with scraper provided, until all liquid is absorbed.
5. Remove the spill with the Scoop & Scraper provided, placing the contents into the yellow Clinical Waste Bag. Once complete, add your Scoop & Scraper to the waste bag and seal with a cable tie. Place the sealed Clinical Waste Bag into the second yellow bag provided.
6. Remove any residue left behind with the Cleaning Cloth. Place the used cloth into the second yellow Clinical Waste Bag. (*the affected area needs to be washed with warm soapy water and / or appropriate disinfectant)
7. Place Face Mask & Eye Protection, Protective Apron and Gloves into the second yellow Clinical Waste Bag and seal with the remaining Cable Tie.
8. Wash your hands with warm soapy water. If soap and water isn't available, use the Antiseptic wipes until a hand washing facility is accessible.
9. You are required to dispose of the Clinical Waste Bag in compliance with your Local Government Regulations.

REMEMBER TO REPLACE YOUR SPILL KIT ONCE USED
