

BioSmart Biohazard Premium Absorbent Powder is produced from a naturally forming inert mineral called Zeolite. Known for its ability to absorb liquids efficiently, it also has the ability to assist with absorbing odours.

BioSmart has the mineral milled to an optimal size granule to achieve the best result possible, primarily for the clean-up of biohazard spills. This is a heavier, easy to use powder and with added odour control, is our Premium BioHazard absorbent

Features:

- Produced from Zeolite, a naturally occurring non-toxic inert mineral.
- Absorbs moisture and odours whilst thickening the spill for a manageable clean-up.
- Added odour control
- Available in a range sizes for separate sale
- For the clean-up of urine, blood, vomit, faeces and saliva. Can also be used to clean-up cooking oils, food spills, detergents and chemicals
