

The workplace environment, vehicles, loading equipment and remote outdoor deployments can be harsh on equipment. A SpillSmart Bund Repair Kit will reduce down time and save money on a replacement bund in the event of an accidental tear. This kit allows you to make fast and simple onsite repairs to your temporary Bund, providing all the essentials to complete a professional long-lasting repair.

SpillSmart Bund Repair Kits can be supplied with PVC, Elvaloy and Polypropylene fabric. Please speak to your local distributor for further information about this product and others in our range.

Designed for:

- Providing an emergency repair to a temporary bund
- A must have when working in remote locations
- Busy worksites when down time is critical

Features:

- Easy to follow instructions
- Kit contains all components to complete a professional repair
- Stores in a strong convenient bag ready for use
