

systems to create the right environment reducing risk of system failures. This multipurpose solution will also assist with odour control, reduce sulphide producing microbes and maintain flow in lift wells and pump stations.

**Designed for:**

- Waste treatment, Grease Traps, Odour control and Pump Outs
- Maintaining clear drains and plumbing
- Broad range of applications including general cleaning, deodorising and breaking down fats, oil and grease

**Features:**

- Natural environmentally friendly ingredients
- Ensure a properly functioning system
- 4 formulations to suit all requirements – Standard, Concentrate, Perfumed and Perfumed Concentrate
- Effective in a wide range of pH levels
- Can be stored for prolonged periods
- Works in all contaminated environments
- Does not compete, distort or disrupt natural environments
- Supports natural bacteria population

EnviroZyme GEN is an all-natural highly concentrated formula manufactured from carefully selected multi-nutrients, essential enzymes and biodegradable surfactants. It contains no harmful chemicals and is safe for humans and the environment. Use as a general cleaning solution to break down fats, oils and grease or as a cleaning agent for grease traps and treatment plants.

EnviroZyme GEN boosts the performance of treatment plants by balancing pH, reducing COD's, BOD's and TSS without the need of toxic chemicals. As a preventive measure use immediately after a pump out or in new
