

SpillSmart Drain Seals provide a simple and effective solution for when spills occur or when liquids need to be decanted close by to a stormwater drain inlet.

Manufactured from heavy-duty polyurethane, it features a high level of chemical resistance to a huge range of contaminants from hydrocarbons and fuels to many strong chemicals. Its pliable tacky exterior assist with creating a good seal and requires no prior preparation before deploying.

How to use

When ordering your SpillSmart Drain Seal, as a guide ensure it is at least 15cm wider than the perimeter of the Stormwater inlet. This will assist to provide a correct fit. A range of sizes are available. Remove any loose debris from around the Stormwater Drain and peel off the protective film on the Drain Seal. Centre over the drain and place it down.

For a greater seal press around the perimeter of the Drain Seal. Please ensure vehicles and machinery do not drive over the seal as it will compromise its effectiveness.

The SpillSmart Drain Seal is reusable, reversible and can be washed down with a non-abrasive detergent or petroleum solvent cleaner after use. Dry it after a wash and store it in the supplied plastic film. EnviroSmart also provide a custom made high-quality PVC carry bag for your Drain Seal.

Designed for:

- Temporary emergency drain protection
- Fuel Stations
- Industrial sites
