

SpillSmart Drill Rig Bunds are a cost effective easy to transport secondary containment solution. These bunds feature removable 100mm memory foam side walls allowing vehicle access when required and the ability to fold store or keep in the back of the truck or ute where space is a consideration. Place under vehicles, leaking pumps, tanks, pipes and valves or use for temporary storage of liquids and chemicals. They are popular for work in remote locations and in oil, gas and mining industries.

These Bunds have multiple fabric options to suit a wide range of site requirements and can be custom made to your client's specification. Please contact your Envirosmart distributor for further information including our range of temporary Bund accessories.

Designed for:

- Work in remote locations
- Service vehicles
- Containment of leaking fluids
 - Temporary storage of liquids and chemicals

Available Materials:

- Heavy Duty UV Stable 900gsm PVC
- Elvaloy Fabric designed for robust applications and the storage of hydrocarbons and a vast array of chemicals
