

SpillSmart Ground Sheets provide an extra layer of protection to preserve the base of your Portable Containment Bund. It's a great addition in situations where your Temporary Bund is used outdoors and prevents damage from gravel, rocks, sticks and site debris. It's also recommended for scenarios where the bund experiences high volume traffic loading and unloading in the bund. SpillSmart Ground Sheets are available in 6 quality options.

Designed to be placed underneath your Portable Containment Bund to provide added resilience to tears and punctures. 3 options available: Geo Fabric – No Border or Backing, Geo Fabric with sewn PVC Border and Geo Fabric with full PVC Backing

Designed for:

- Protection for the base of a temporary bund in harsh conditions
- Provides a barrier between the temporary bund and the ground in the event of a small puncture
- Indoor and Outdoor use

Features:

- Adds puncture and tear resistance to the Portable Containment Bund floor
- Great for Indoor / Outdoor use
- PVC models are double stitched with durable industrial thread
- All options available in Light Duty and Heavy-Duty Fabrics

Sizes:

- SpillSmart Ground Sheets are custom made to order

ES-B-GS-L-GEO	270gsm Geo Fabric - No PVC Borders or PVC Backing
ES-B-GS-L-GPVC	270gsm Geo Fabric - UV Resistant 610gsm PVC Border, Double Stitched
ES-B-GS-L-PVC	270gsm Geo Fabric - UV Resistant 610gsm PVC Backing, Double Stitched

best choice for rocky ground whilst working out in the field. The heavier Geo Fabric also provides initial protection for an unexpected leak.
