

Purchasing Poly Absorbent Rolls is both a popular and convenient choice for many businesses. The ability to roll out a large mat size absorbent for larger coverage or simply only using exactly what you need for tool and tank wipe downs or to fix up those annoying drips and splashes makes them very cost effective by reducing wastage. For work environments where space is premium a Poly Absorbent Roll Holder is one of those small additions that makes a big difference.

Fastened to a wall space is already saved by reducing its storage footprint and from a health and safety perspective, no more lugging a large roll and damaging it on the floor. It creates fast and easy access and for nonperforated rolls, makes cutting simple. SpillSmart Poly Roll holders are a metal construction, powder coated and supplied with fastening bolts.

SpillSmart Poly Rolls are available in:
